ENFORCE SUITE

Configuration of IT systems - secure and state of the art

TRANSPARENT I AUTOMATED I COMPREHENSIBLE

FB Pro GmbH

CYBER ATTACKS
SECURITY RISKS IN COMPLIANCE

67% of all companies had identified at least one potential safety issue in 2018

20% of all medium-sized companies know they have been a victim of cyber criminals

Only **28%** of all companies keep up with the GDPR principles

For **40%** of all SMEs hacker attacks & data theft are the main threatening hazards

Secure your IT systems with technical measures.

Compliant to legal requirements.

ENFORCE SUITE will provide the support you need.

A single product - containing two solutions

ENFORCE TAP
YOUR BENEFITS

System hardening
ENFORCE TAP is offering a proven solution to harden your operating system as well as your browser or your office package in accordance with established standards.

System diversity
The hardening packages are available for Windows 10, Windows Server 2016, MS Office 2016, SQL Server 2016, Mozilla Firefox, Google Chrome and more.
Individual hardening packages for special systems can also be provided - please contact us.

Self optimization
The ENFORCE TAP creates a self healing system with configuration settings being automatically confirmed to a predefined desired state.

Compliance
Keep up with the current legal situation and regulations by means of proven standards.

Documentation
ENFORCE TAP delivers documentations and records to provide obligatory documentation concerning the General Data Protection Regulation (GDPR).

Surveillance
Depending on expansion and application thousands of settings can be controlled and corrected on a regular basis.
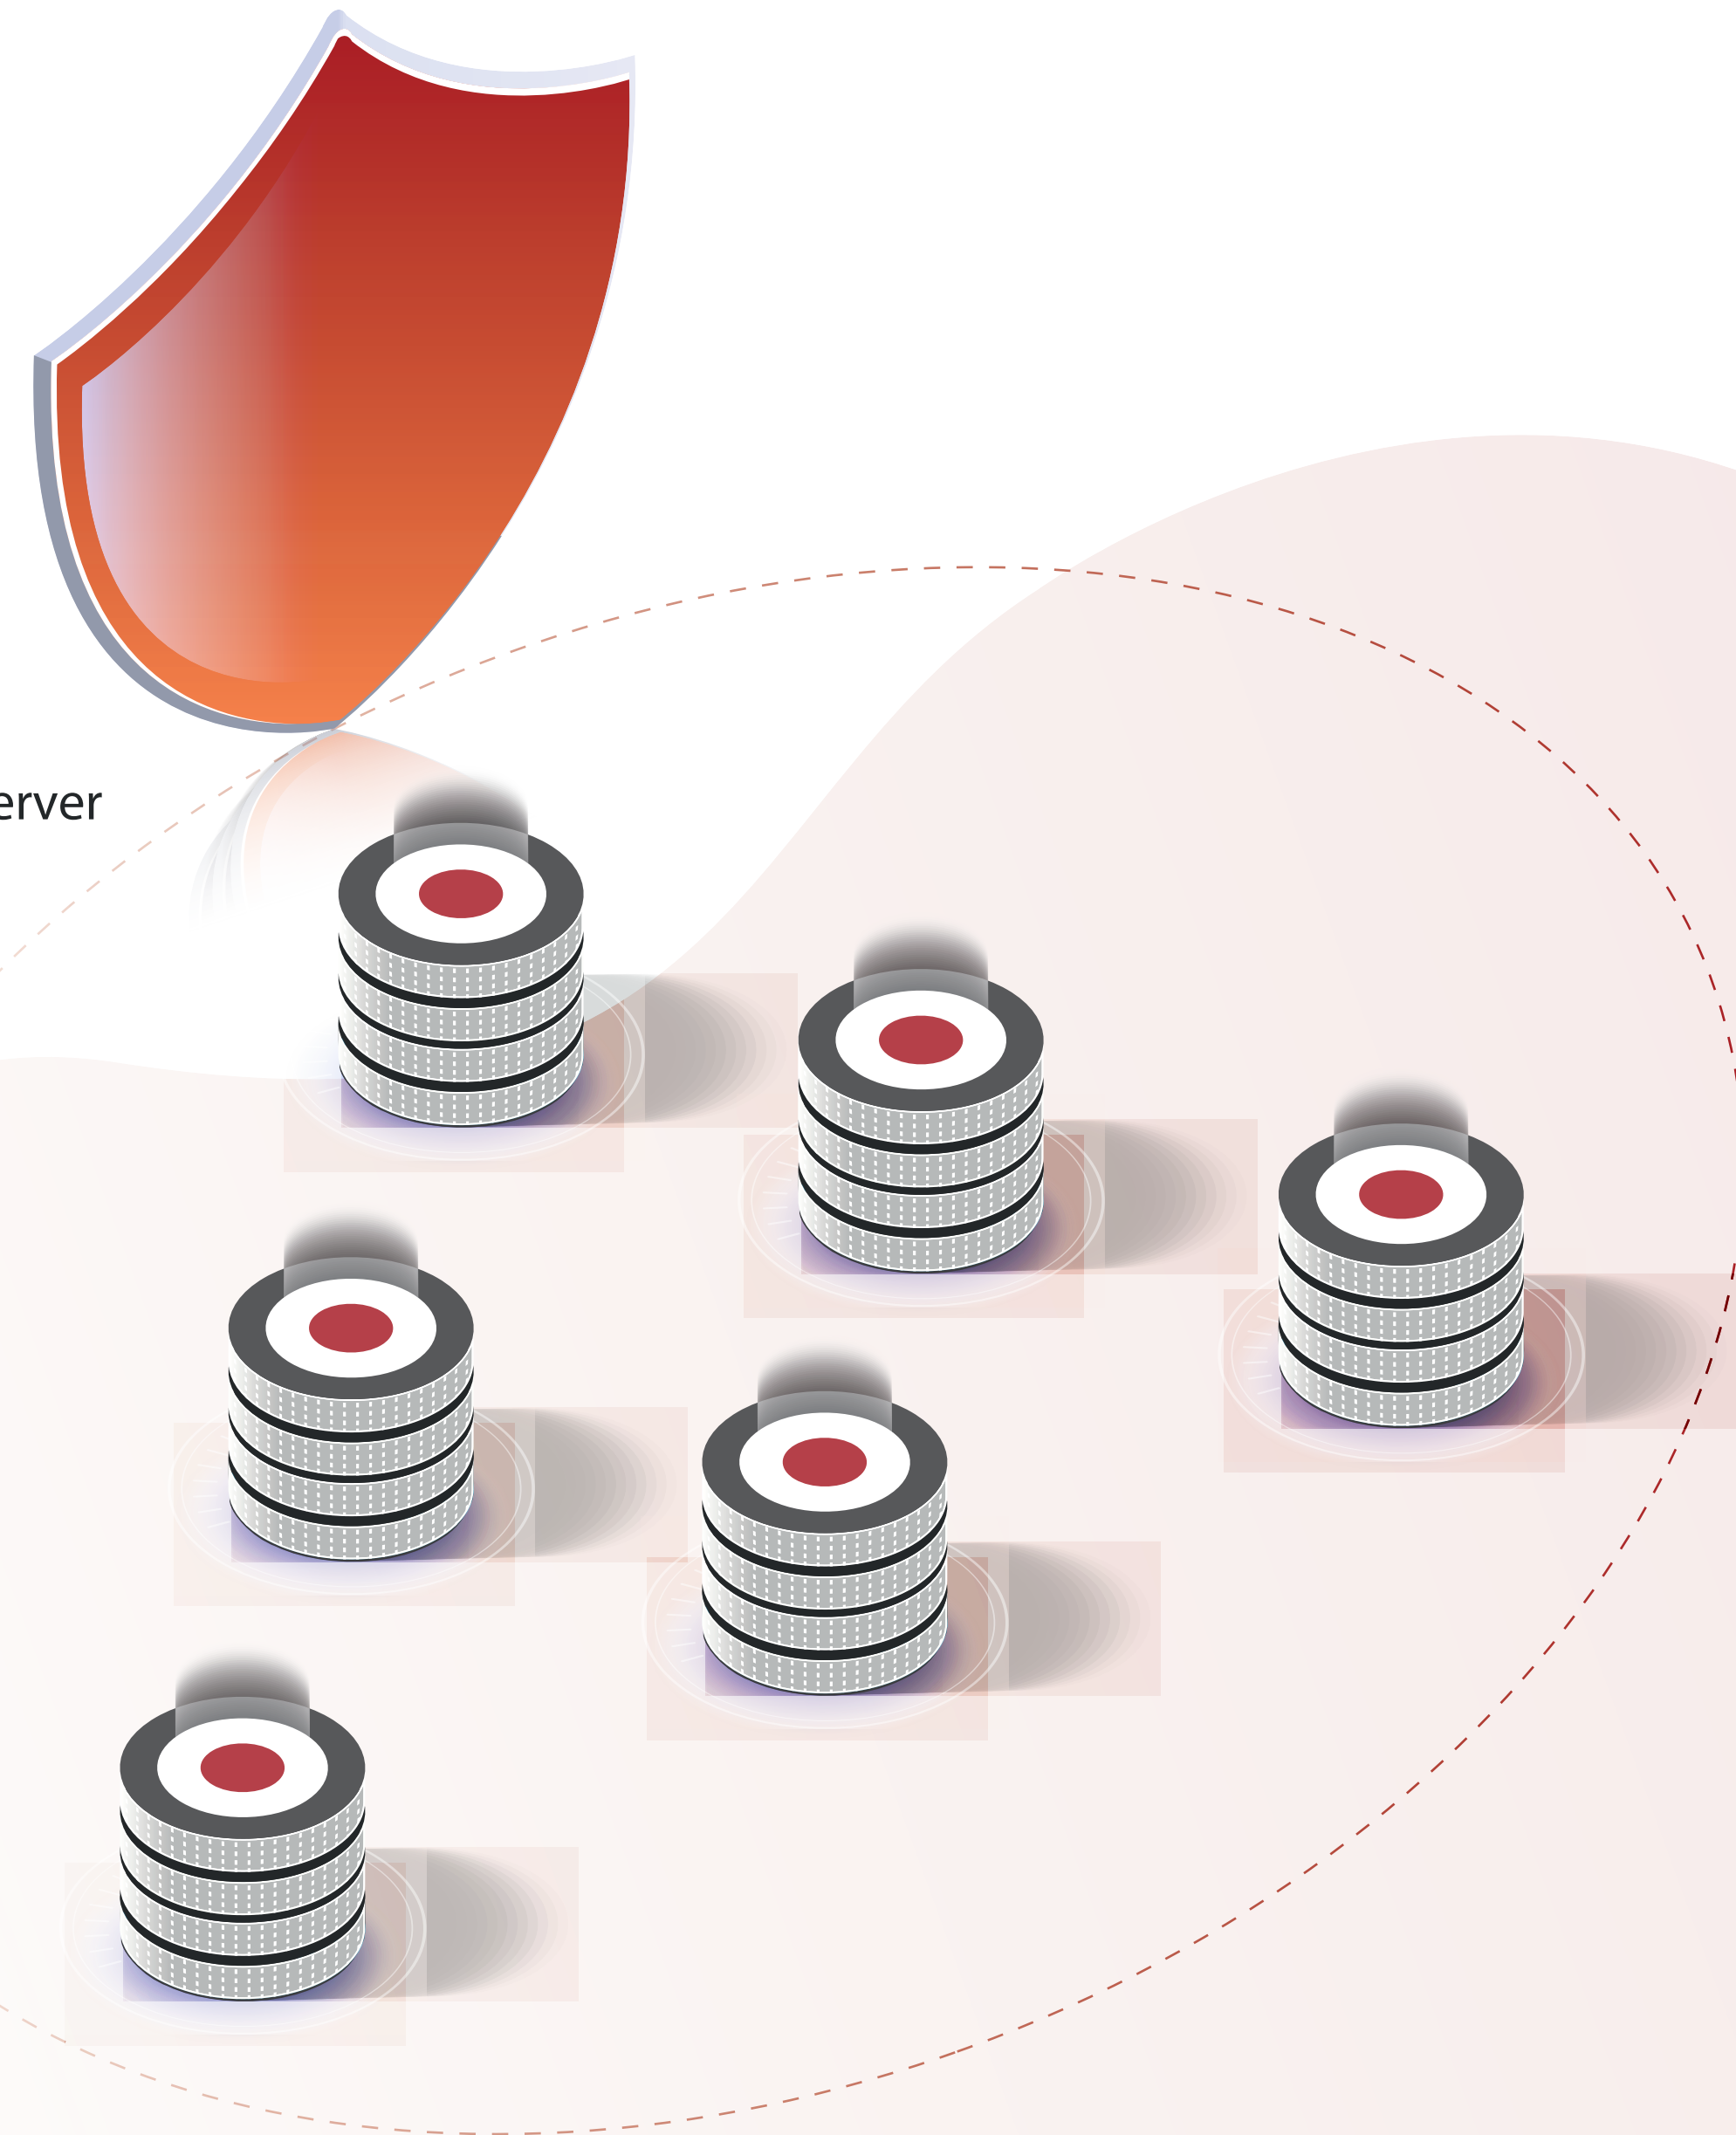

❯ ENFORCE TAP
HOW YOUR SYSTEMS ARE SECURED

E X A M P L E S   3

Windows 10 / Server 2019
- Secure configuration of Windows Update, WinRM, Windows Firewall & more
- Limiting exposure to attacks by eliminating nonrelevant services
- Deactivating guest accounts and renaming the administrator's account
- Installing complexity and age requirements for passwords

Mozilla Firefox
- Activating automatic updates and the 'Download Virus Scanner'
- Blocking pop-ups
- Visualizing punycodes

Google Chrome
- Deactivating functions such as data synchronization
- Activating the 'Hide ID' mode
- Configurable usage of plug-ins
- Activating 'Safe-Browsing' mode

According to the chosen configuration level, ENFORCE TAP offers individual solutions for the following systems:

Windows 10
Windows Server 2016 / 2019
SQL Server 2016 / 2019
MS Office 2016
Mozilla Firefox
Google Chrome
and more

FACTS
- Up to thousands of different configurations/settings available - depending on the requested package level and target system
- Successful application at large corporations and medium sized enterprises
- Amongst others available for Windows 10, Windows Server 2016 / 2019 (also Server Core)
- Maximum reliability thanks to application of proven Microsoft technology
- Optimizations based on long-term expert experiences and up-to-date IT regulations
- Technical solutions and additional documentation

❯ ENFORCE TAP
PLUS ADMINISTRATOR

Features

- Report function for each managed system (server, client, etc.)
- Compliance status about the pre-defined targets
- Automated notifications by e-mail for definable events
- API for an automated connection for line-of-business systems
- Administration of servers, server roles and groups
- Central management of multiple environments

Your benefits

- Reduction of testing efforts by applying effective configuration packages – e.g. for GDPR compliance, workstation hardening and Windows Server configurations
- Distribution of company-wide hardening and privacy settings based on ENFORCE TAP as well as other configurations
- Time-controlled processing of tasks incl. a transparent reporting interface
- Easy integration and automation with other systems based on REST APIs

- Automated preparation of new IT systems for integration, e.g. Firewall and authorization reviews, creation of certificates, technical configurations and more
- Integration into system environments by using proven standards (such as OAuth2.0, Kerberos)
- Secure identity management, reliable storage of credentials, fully encrypted by state of the art algorithms

❯ ENFORCE ADMINISTRATOR
AS A SERVICE
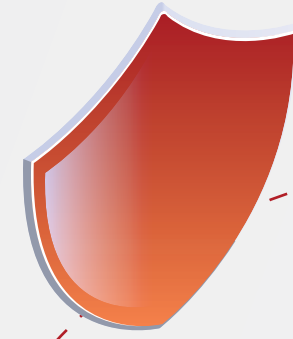

Our services

- Updating the ENFORCE SUITE
- Back-up / restore service
- Execution of hardening change requests
- Testing new configurations
- Add new systems to the hardening
- Rollback of false configurations
- Consultancy in case of required configuration changes

Your benefits

- Our FB Pro experts are your perfect partners for all aspects concerning ENFORCE ADMIN SaaS solution. This includes:
  - installation and configuration
  - compliance checks and audits
  - reports analysing
  - triggering incidents
  - system maintenance
- No invests in hardware or manpower
- Scalable costs with a transparent accounting
- Cooperation with defined SLA
- Reduce your skills shortage, esp. in holiday times, in cases of illness, etc.

We work process integrated

- Our experts integrate into your processes seamlessly
- The requirements of your internal team directly reaches our team via your ticketing system
- Implementation of service request due to defined Service Level Agreements (SLA)
- In case of incidents our team directly contacts your IT specialists
