

# TROVENT

## Application Security Audit Confirmation

Trovent Security GmbH confirms the successful completion of a

### Penetration Test

of **FB Pro GmbH's** application

### Enforce Administrator

### Scope

Trovent Security GmbH tested the **Enforce Administrator** web application.

### Methodology

The penetration test was performed using a combination of automated and manual testing methods. The **Enforce Administrator** web application was checked for web application security weaknesses on the basis of methods described in the OWASP Web Security Testing Framework.

### Period

Penetration testing period: 2022-04-05, retest on 2022-06-15

### Result

The penetration test of the **Enforce Administrator** web application did not result in any security vulnerability findings with a high or critical risk rating. The final penetration retest did not result in any remaining security vulnerability findings.

### Signature

A handwritten signature in black ink, appearing to read 'Alexander Caswell', written over a horizontal line.

Alexander Caswell, Managing Director

### About Trovent Security GmbH

Trovent is a provider of cyber security solutions and services headquartered in Bochum/Germany. Trovent provides services enabling its customers to take action before disaster strikes, including penetration testing, vulnerability-management-as-a-service and anomaly/threat detection solutions.
